Important Points to Consider

Type of presentation

Please note that headspace Newcastle provides community presentations that are of a general nature with a health promotion focus. The presentations have been created to promote positive mental health and well-being and to encourage early help seeking behaviour amongst young people. Our Community Development team is unable to deliver presentations which are a medical intervention or have a therapeutic focus.

Invite Other Schools

We encourage partnering with other schools when creating events such as well-being days. Due to the number of requests which headspace Newcastle receives, events that encourage interschool partnerships and reach a broader audience will be prioritised.

Description of presentation required eg whole year group, class by class, mental health day etc

Are there any issues or incidents which headspace Newcastle should be aware of before presenting at the school?

Further comments or notes
