TECHNO CRAFT

You don't need to be an artist or a technology whizz. You just need to be creative and ready to bring a little magic to Bathurst!

ART WORKSHOPS

WHAT'S INVOLVED?

This program will teach you how to build interactive artworks that incorporate state of the art technology.

If your application is successful you'll need to be available to attend five weekly workshops starting on Tuesday 27 March 2018. You finished project will form part of a new technology and arts program that will launched at **headspace** Bathurst during Term 2.

As part of your enrolment in this workshop you will be given a budget of $50. These funds will be used by **headspace** Bathurst to purchase the materials you need to turn your idea into techno active art.

WHO CAN APPLY?

Any young person aged 12 to 17 years. Spaces in this program are limited so you'll need to complete an application form.

HOW CAN I APPLY?

You can download an application form from the **headspace** Bathurst website. If you have questions call Karen at **headspace** Bathurst on 6338 1100.

You will need to create a drawing or model that showcases your idea and submit it as part of your application. Your drawing or model doesn't need to be techno active at this point, but you will need a plan on how you might include technology in your design.

Entries can be dropped in at **headspace** Bathurst 102 Keppel Street Bathurst or phone 6338 1100 to arrange collection from your school.
