

Sue

Youth Mental Health Clinician

What is your role at headspace?

Meet with young people who want to get help with struggles in their lives.

Where are you from?

I was born in Wiltshire in England.

Where have you been?

I left England when I was young and lived in Cyprus for

a while because my dad was in the Royal Air Force. I've also lived in AoTearoa/New Zealand. I've travelled around the world a bit to Europe, USA, South America, Asia and North Africa doing volunteer work in animal and land conservation and working with children.

What have you studied / for how long?

I studied at Bournemouth Uni in England for a Diploma in General Nursing (3 yrs) & an Honours Degree in Mental Health Nursing (18 months).

What do you love about what you do and what is the biggest challenge?

My favorite part of the work is helping people strengthen their abilities and being trusted by them and their families to do this. I think the biggest challenge is knowing how much work there is to do in the Kimberley to support young people.
