

## Colour Concepts

**headspace** centres feature designs using the colour scheme below. This chart may be helpful in your design of the surf board.

You are in no way obligated to feature all, or any, of these colours. They are just a suggestion for possible artistic designs.

## Using the Surfboard template

The size of the wooden surfboards will be approx. 1200mm long by 400mm wide.

The template provided is a scaled down version of this, and once assembled should measure approx. 750mm long by 250mm wide.

Using the 4 pages, line up the dotted lines, and outer circle. Then glue or tape the pages together. This can then be used as a basis for your design.

If you require any extra information about the size, surfboards, or templates, please contact us.
